Practical Concerns – “YES” to “I live alone”

Start With
Asking the patient the below questions

Sometimes people need help with basic care needs.

Do you have someone you can depend on to help with basic care needs such as bathing and dressing?

If Yes

Further inquire, document in referral:
- Ask who the help is and when a vailable
- Does pt need more help or support?
- Inquire if patient currently has any home services (i.e. homemaker, hired caregiver, visiting nurse) and if not, does pt need help getting them?
- Inquire if there is an understanding of how their cancer diagnosis or treatment may affect their abilities
- Conduct an ADL/IADL assessment
- If there is any question about the patient’s cognitive condition, make note on referral

Patient with ADL/IADL inability:
Refer to Physician/APC or Nurse
- Assess for patient frailty or physical function. Physical difficulties may be partially or fully reversible, consider referral to PT/OT
- Discuss progression and treatment if there is a lack of understanding
- Screen for cognitive issues if indicated

As a clinician do you have concerns about this patient living alone currently or in the near future?
Ability to live alone should be based on:
- Physical Function Status
- Emotional Status
- Cognitive Status

Refer to Social Worker for assistance with home services

If No

Further inquire, document in referral:
- Encourage patient to seek out any help they have used in the past (Family, friends, faith community, neighbors)
- Inquire if patient has ever used home services (i.e. homemaker, hired caregiver, visiting nurse) and if not, does pt need help getting them?
- Conduct an ADL/IADL assessment
- If there is any question about the patient’s cognitive condition, make note on referral

NOTE: If patient reports living alone, has no services, and has difficulty with ADLs/IADLs—should prompt an urgent referral to social work and PT

Patient with no ADL/IADL inabilities:
Refer to Social Worker for assistance with home services

If No

Refer to Social Worker for assistance with socialization opportunities

Notes

Any Stage – Patients at any stage may need services if living alone. Conducting an ADL/IADL assessment will help indicate if there is enough help or a need of help. Medication adherence or transportation (See Follow Up Reference to “Transportation” concerns for guidance) issues may need addressing. May have financial issues paying for services if low income or getting services from Department of Aging.

Stage IV – Several stage IV cancers qualify under compassionate allowances for quickly obtaining Social Security Disability Insurance or Supplemental Security Income programs, which could have pay for home care services.

Geriatric - Geriatric sub-team discussing clinician guidance for physical frailty and function assessment, info to follow.
